

Creating and Managing Requests

Types of requests

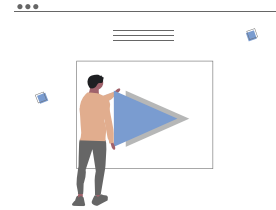

Requests are a brand new feature on Casting Networks® that allows you to quickly collect necessary information about talent within your project. There are currently two types of requests:

Media Requests

Collect self tapes or ask for a specific type of media (video, audio, PDFs and more). Talent can upload up to 10 pieces of media per request.

Question Requests

Ask a question to talent in a specific project. This might be used to get more information on their experience.

View responses

To view responses to a request, click "Requests" below any project name. When viewing details for any request, there is a column titled "Response" to indicate the current status of the request by talent.

Worksheet

The worksheet is a tool to help organize and keep track of talent in a project. It will show all talent you have:

- Selected for a role
- Added to a request
- Added to a schedule
